TRANSACTION

# Transaction Summary

## Current asset scope and deal summary

FolioFrame is a buyer-ready static service website and static portal/demo surface built to showcase the Signature Launch Premium solution and support checkout-to-customer delivery conversations.

### Buyer-ready static assets

Approved site, portal demo surface, and all materials needed for buyer review, diligence, and handover - without live systems or production access.

**Built for review**  
Ready for handover

### What is included

The transferred package delivers everything needed for buyer review, diligence, and deployment preparation.

- ✓ Approved brand system and design assets
- ✓ Public marketing website (static)
- ✓ /app demo surface (static)
- ✓ Sale-room documentation and evidence pack
- ✓ Commercial uplift materials

### Current state

Static, review-ready environment. No live systems are connected.

- ✓ Environment: Static site + portal/demo
- ✓ Connectivity: No live integrations
- ✓ Data: Sample/demo content only
- ✓ Access: View-only, no production access

### Core deliverables

Assets enabling evaluation, decision-making and smooth transition to implementation.

- ✓ Approved UI/brand kit
- ✓ Deployment-ready Next.js build
- ✓ Closing and sale-room documentation
- ✓ Buyer service revenue model

### Key exclusions

The following production capabilities and systems are not included yet.

- ✗ No production authentication
- ✗ No payment processing
- ✗ No customer database
- ✗ No automated fulfilment
- ✗ No production webhooks

## SCHEDULE

# Asset Transfer Schedule

Branded, technical, and documentation assets included in transfer

### Brand assets

Approved logos, colour system, selected motifs, visuals 01-10

Included

### Product surfaces

Homepage, Signature Launch, pricing, and /app static portal

Included

### Documentation

Sale-room pack, QA reports, deployment and handover notes

Included

### Commercial uplift

Demo walkthrough kit, IP checklist, buyer service revenue model

Included

### Appendices

Sale-room PDF, commercial uplift ZIP, and editable model XLSX

Included

Rejected generated motif archives remain excluded from active use.  
They are retained only as historical reference and are not part of the approved transfer package.

DILIGENCE

# IP & Licensing Checklist

## Rights transfer and license review

Confirm ownership, licenses and obligations are clear and transferable before handover and closing.

### Checklist, not legal advice.

This checklist is for operational diligence only. Consult legal counsel for IP and licensing advice.

#### 1. IP transfer items

In review

Confirm assignment of source code, documentation, brand assets and know-how.

#### 2. Approved asset rights

Complete

Only approved FolioFrame brand assets are included. Rejected assets are excluded.

#### 3. Domain and trademark review

In review

Verify domain ownership, transferability and trademark availability.

#### 4. Third-party dependency licenses

In review

Review package licenses, provider terms and continuing obligations.

#### 5. Outstanding diligence

Open

Validate contributor assignments and any open IP or licensing items.

FolioFrame approved brand assets are part of this package where included. Generated/rejected assets are not part of the active brand system.

TECHNICAL

# Technical Handover

## Repository, build health, environment, and deployment notes

### Repository baseline

Clean working tree, no uncommitted changes.  
Dependencies installed and locked. Prisma generated.  
Approved assets preserved.

### Build status

|                         |        |
|-------------------------|--------|
| npm run prisma:generate | Passed |
| npm run lint            | Passed |
| npm run typecheck       | Passed |
| npm run build           | Passed |

### Environment

Next.js App Router, TypeScript, Tailwind/locked tokens.  
Static buyer/demo deployment path.

### Key routes

Primary routes verified for buyer demo.

/ /signature-launch /pricing /app  
/robots.txt /sitemap.xml

### Quick commands

```
npm run prisma:generate
npm run lint
npm run typecheck
npm run build
```

### Deployment notes

Safe variable: NEXT\_PUBLIC\_APP\_URL. Do not  
configure live production auth, billing, database or  
integration secrets for this static phase.

Handover summary: Codebase is clean, builds successfully, and is ready for static buyer/demo deployment. Routes, metadata and assets are generated and verified.

COMMERCIAL

# Commercial Materials

## Buyer-facing materials included in the closing pack

These materials support buyer review, positioning and diligence. They provide evidence, context and clarity - not live operational metrics.

### Sale-room pack

Curated collection of key documents, summaries and review notes.

**STATIC REVIEW ASSETS**

#### What it helps buyers do

- ✓ Understand scope and diligence status
- ✓ Evaluate commercial fit and next steps

### Recorded demo walkthrough kit

Guided script, storyboard, captions and recording QA checklist.

**DEMO & WALKTHROUGH**

#### What it helps buyers do

- ✓ Understand scope and diligence status
- ✓ Evaluate commercial fit and next steps

### Buyer service revenue model

Revenue logic, price bands and delivery assumptions.

**MODEL OVERVIEW**

#### What it helps buyers do

- ✓ Understand scope and diligence status
- ✓ Evaluate commercial fit and next steps

### Outreach and valuation materials

Target buyer profile, valuation summary and outreach copy.

**STRATEGIC CONTEXT**

#### What it helps buyers do

- ✓ Understand scope and diligence status
- ✓ Evaluate commercial fit and next steps

### Buyer FAQ / disclosure

Answers, clarifications and non-operational disclosures.

**DISCLOSURE & CLARITY**

#### What it helps buyers do

- ✓ Understand scope and diligence status
- ✓ Evaluate commercial fit and next steps

Important: These materials support review and decision-making. They do not provide live data, real-time operational metrics or execution guarantees.

## MODEL

# Buyer Service Revenue Model

Illustrative service-led revenue paths, not historical revenue

£

## Editable model included

The included XLSX shows Low, Base and Upside revenue paths, monthly ramp assumptions, contribution assumptions, retainer path and buyer value bridge.

### Low path

Conservative manual launch with limited premium implementation volume.

### Base path

Balanced service launch using audit, premium implementation and retainer paths.

### Upside path

Higher utilization of Signature Launch Premium, add-ons and agency/retainer expansion.

i

Illustrative only: The model is not formal valuation advice and does not claim historical revenue, existing customers, usage metrics or live SaaS operations.

## Revenue model contents

TRANSITION

# Deployment & Transition

## Suggested transfer path for the static buyer/demo build

Static buyer demo first. Live SaaS hosting, payments, monitoring and support operations are out of scope and estimated separately.

DISCLOSURE

# Red-Flag Disclosure

## Important boundaries for buyer review

### Static/demo only

No live systems or integrations connected.

### No prod auth

No production user accounts or role-based access.

### No live billing

No payment gateways, billing systems or financial transactions.

### No customer DB

No real buyer, customer, support or operational records.

### No automation

No fulfilment workflows or provisioning automation.

### No live support ops

No live monitoring, ticketing or support desk.

### Legal review required

Buyer must complete legal, privacy and security review.

FolioFrame is prepared to present as a polished service brand and static portal/demo surface, ready for buyer review and due diligence.  
It is not a live, automated SaaS in operation.

CHECKLIST

# Closing Checklist

## Pre-transfer and post-transfer completion items

Use this checklist to confirm critical items are completed before, during and after the transfer and handover.

|  Before closing | STATUS        | COMPLETE                 |
|----------------------------------------------------------------------------------------------------|---------------|--------------------------|
| Asset archive delivered                                                                            | ● Not started | <input type="checkbox"/> |
| Repo access confirmed                                                                              | ● Not started | <input type="checkbox"/> |
| Brand files delivered                                                                              | ● Not started | <input type="checkbox"/> |
| Sale-room documents included                                                                       | ● Not started | <input type="checkbox"/> |
| Deployment notes included                                                                          | ● Not started | <input type="checkbox"/> |
| Legal/privacy review noted                                                                         | ● Not started | <input type="checkbox"/> |

|  At transfer | STATUS        | COMPLETE                 |
|-------------------------------------------------------------------------------------------------|---------------|--------------------------|
| Approved assets verified                                                                        | ● In progress | <input type="checkbox"/> |
| Env handling confirmed                                                                          | ● In progress | <input type="checkbox"/> |
| Buyer acknowledgement completed                                                                 | ● In progress | <input type="checkbox"/> |

|  After handover | STATUS        | COMPLETE                 |
|----------------------------------------------------------------------------------------------------|---------------|--------------------------|
| Post-transfer QA run                                                                               | ● Not started | <input type="checkbox"/> |
| Support channel confirmed                                                                          | ● Not started | <input type="checkbox"/> |
| Deployment route check completed                                                                   | ● Not started | <input type="checkbox"/> |

SIGN-OFF

# Closing Sign-Off

## Buyer acknowledgement and handover confirmation

This page confirms receipt and review of the static buyer/demo build and associated materials. It is not a legal sale agreement.

### This closing package includes:

- ✓ Transaction summary and journey overview
- ✓ Approved asset schedule and IP checklist
- ✓ Commercial materials and disclosures
- ✓ Static demo workspace and access details
- ✓ Handover artifacts and documentation
- ✓ Sign-off acknowledgement

### Seller

Name: \_\_\_\_\_

Title: \_\_\_\_\_

Company: \_\_\_\_\_

Signature: 

Date: \_\_\_\_\_

### Buyer

Name: \_\_\_\_\_

Title: \_\_\_\_\_

Company: \_\_\_\_\_

Signature: 

Date: \_\_\_\_\_

### Effective date

This handover is effective as of: \_\_\_\_\_

### Transferred materials

- ✓ Static demo workspace and configuration
- ✓ Documentation, guides and implementation references
- ✓ Evidence packets and review artifacts
- ✓ Access details and environment notes

Important note: This package relates to the static buyer/demo build and associated materials. It does not include live data, production credentials or real transaction records.

## MANIFEST

# Package Manifest

## Files included in the premium closing package

### Included files

- ✓ Premium closing package PDF
- ✓ Approved FolioFrame logos
- ✓ Selected approved motifs
- ✓ Commercial uplift pack v1
- ✓ QA report and render contact sheet
- ✓ Editable Markdown closing-package source docs
- ✓ Approved visuals 01-10
- ✓ Buyer sale-room PDF v1
- ✓ Buyer service revenue model XLSX

### Excluded from package

Generated closing-page direction images, rejected generated motif assets, credentials, .env files, .git, build output, database volumes and node\_modules are intentionally excluded.

### Recommended buyer next step

Review the static demo, complete IP/legal/license diligence, run deployed-domain QA and decide whether to deploy as a service brand or scope live SaaS buildout.

## Ready for buyer review

FolioFrame is buyer-ready as a static service website, static portal/demo surface and future service-led SaaS foundation. It should not be represented as live automated fulfilment software until a separate production implementation phase is complete.
