

FolioFrame Closing Package

Deterministic source-rendered handover package

Generated date: 2026-07-05

Source branch: folioframe/deploy-production-static-demo

Source baseline commit: 8e6f830

FolioFrame is packaged here as a static service website and static portal/demo surface. It is not represented as live SaaS, live billing, production auth, live customer data, live monitoring or automated fulfilment.

Included Source Documents

- Closing Package Source
- Transaction Summary
- Asset Transfer Schedule
- IP License Transfer Checklist
- Technical Handover
- Commercial Materials Index
- Deployment Transition Plan
- Red Flag Disclosure
- Closing Checklist
- Closing Sign-Off
- Closing Package Manifest

FolioFrame Closing Package Source

Source Status

- Package name: FolioFrame Closing Package v1
- Generated date: 2026-07-05
- Current branch at generation: folioframe/deploy-production-static-demo
- Source baseline commit: 8e6f830 Add FolioFrame production static demo deployment checklist
- Package manager: npm@11.12.1
- Build command: npm run build
- Build verification date: 2026-07-04
- Build verification result: npm run prisma:generate, npm run lint, npm run typecheck and npm run build passed.
- Static build reference: npm run build generated 63/63 static pages.

Purpose

This closing package is a deterministic, source-rendered handover package for FolioFrame.

The previous generated closing-package page images are approved only as visual direction. They are not used as final sale materials, not treated as source of truth, and not included as final content.

Source Of Truth

The closing package is built from:

- Editable Markdown files in docs/closing-package/
- Approved FolioFrame logo assets in public/assets/logos/
- Approved FolioFrame visuals in public/assets/visuals_01_to_10/
- Curated motifs in public/assets/curated_motifs/ only as optional subtle supporting decoration
- Actual QA screenshots from docs/qa/screenshots/
- Deterministic PDF render source in docs/closing-package/render_closing_package_pdf.py

Approved Logo Assets

The approved logo assets are:

- public/assets/logos/APPROVED_primary_logo_transparent.png
- public/assets/logos/APPROVED_primary_logo_mono_ivory.png
- public/assets/logos/APPROVED_standalone_emblem_transparent.png

No generated logo, traced logo, substitute wordmark, redrawn emblem or image-generated logo is allowed in this package.

Approved Visual Assets

The approved visual set is:

- public/assets/visuals_01_to_10/visual_01_Source_Truth_System.png
- public/assets/visuals_01_to_10/visual_02_Dashboard_Command_Centre.png
- public/assets/visuals_01_to_10/visual_03_Checkout_to_Access_Flow.png
- public/assets/visuals_01_to_10/visual_04_EntitlementFrame_Access_Control.png
- public/assets/visuals_01_to_10/visual_05_DeliveryProof_Workspace.png
- public/assets/visuals_01_to_10/visual_06_RevenueFrame_Recovery_Workspace.png
- public/assets/visuals_01_to_10/visual_07_Workspace_Setup_Onboarding.png
- public/assets/visuals_01_to_10/visual_08_Implementation_Handover_Room.png
- public/assets/visuals_01_to_10/visual_09_Strategic_Buyer_Summary.png
- public/assets/visuals_01_to_10/visual_10_Sale_Room_Cover.png

Screenshot Evidence

When screenshots are referenced, use actual responsive QA screenshots, including:

- docs/qa/screenshots/final-buyer-ready-launch-qa-2026-07-02/home-desktop-1440.png
- docs/qa/screenshots/final-buyer-ready-launch-qa-2026-07-02/home-mobile-390.png
- docs/qa/screenshots/final-buyer-ready-launch-qa-2026-07-02/pricing-desktop-1440.png
- docs/qa/screenshots/final-buyer-ready-launch-qa-2026-07-02/pricing-mobile-390.png
- docs/qa/screenshots/final-buyer-ready-launch-qa-2026-07-02/app-desktop-1440.png
- docs/qa/screenshots/final-buyer-ready-launch-qa-2026-07-02/app-mobile-390.png

Do not use image-generated UI screenshots, generated text panels or generated closing-package page images as final evidence.

Static/Demo Boundary

FolioFrame is ready as a static service website and static portal/demo surface.

It is not represented as live SaaS, live billing, production auth, live customer data, live monitoring, active support tickets or automated fulfilment.

Output Files

The deterministic exports are:

- docs/closing-package/FolioFrame_Closing_Package_v1.pdf
- FolioFrame_Closing_Package_Source_Controlled_v1.zip

FolioFrame Transaction Summary

Transaction Context

FolioFrame is a premium buyer-access reliability system for digital product sellers.

It positions the business around checkout-to-customer delivery: payment handoff, entitlement rules, access lifecycle, delivery, onboarding, support recovery, follow-up, migration, launch monitoring recommendations, reporting and verified delivery proof.

Asset Being Prepared For Transfer

The current package prepares FolioFrame for review and transfer as:

- A buyer-ready static service website.
- A static portal/demo surface.
- A structured implementation methodology.
- A set of service offers and module definitions.
- A documented path toward future service-led SaaS buildout.

Current Technical State

Current branch:

- folioframe/deploy-production-static-demo

Current source baseline commit:

- 8e6f830 Add FolioFrame production static demo deployment checklist

Current build stack:

- Next.js App Router
- TypeScript
- Tailwind CSS
- Prisma foundation
- Clerk foundation
- npm package manager

Verified Build Commands

Use npm for this repository:

```
npm run prisma:generate
```

```
npm run lint
```

npm run typecheck

npm run build

The latest verified build produced 63/63 static pages.

Transaction Boundary

The asset should not be sold as an operating live SaaS today.

The current transferable value is the brand system, static website, demo portal, implementation documentation, service packaging, QA evidence, deployment readiness and live-product foundation planning.

Not Included As Live Production Capability

The following are not active production systems in the current package:

- Live billing
- Live Stripe checkout
- Live webhooks
- Production auth
- Real customer records
- Live support tickets
- Production email sending
- Live monitoring
- Automated fulfillment

Buyer Use Cases

A buyer can use FolioFrame to:

- Launch a premium service website.
- Present a credible buyer-facing demo.
- Sell implementation engagements.
- Continue the service-led SaaS buildout.
- Use the documented modules and SOPs as a delivery method.

Closing Recommendation

Proceed with transfer as a static service-brand asset and demo foundation.

Require separate approval, implementation and diligence before representing FolioFrame as live software.

FolioFrame Asset Transfer Schedule

Purpose

This schedule lists the asset classes expected in a FolioFrame closing handover.

It is not a legal assignment instrument. Buyer and seller should use it as a checklist for transfer confirmation.

Repository Assets

Transfer package should include:

- Application source code.
- app/ routes and layouts.
- components/ shared interface components.
- content/ module, offer, demo and implementation data.
- docs/ documentation and QA evidence.
- public/assets/ approved brand assets.
- Prisma schema and live-product foundation files.
- Package manifests and configuration files.

Approved Logo Assets

Approved logo files:

- public/assets/logos/APPROVED_primary_logo_transparent.png
- public/assets/logos/APPROVED_primary_logo_mono_ivory.png
- public/assets/logos/APPROVED_standalone_emblem_transparent.png

Transfer note:

- These files are the only logo files to use.
- Do not redraw, regenerate, trace, crop, imitate or substitute the logo.

Approved Visual Assets

Approved flagship visual files:

- public/assets/visuals_01_to_10/visual_01_Source_Truth_System.png
- public/assets/visuals_01_to_10/visual_02_Dashboard_Command_Centre.png
- public/assets/visuals_01_to_10/visual_03_Checkout_to_Access_Flow.png
- public/assets/visuals_01_to_10/visual_04_EntitlementFrame_Access_Control.png

- public/assets/visuals_01_to_10/visual_05_DeliveryProof_Workspace.png
- public/assets/visuals_01_to_10/visual_06_RevenueFrame_Recovery_Workspace.png
- public/assets/visuals_01_to_10/visual_07_Workspace_Setup_Onboarding.png
- public/assets/visuals_01_to_10/visual_08_Implementation_Handover_Room.png
- public/assets/visuals_01_to_10/visual_09_Strategic_Buyer_Summary.png
- public/assets/visuals_01_to_10/visual_10_Sale_Room_Cover.png

Curated Motifs

Curated motifs are stored under:

- public/assets/curated_motifs/

Use them only as subtle supporting decoration. Do not treat motif files as logo replacements or final brand marks.

Documentation Assets

Documentation to transfer includes:

- Implementation blueprints.
- SOPs and runbooks.
- QA reports.
- Deployment notes.
- Sale-room package.
- Closing package.
- Static/demo boundary disclosures.

Excluded Or Restricted Items

Do not transfer or represent as included:

- .env
- .env.local
- Production credentials
- Local database volumes
- Real customer data
- Rejected generated assets
- Image-generated closing-package page images as final sale materials

Transfer Confirmation

Buyer should confirm:

- All approved asset files exist.
- No rejected generated asset filenames are referenced.
- No live secrets are included.
- Repository history and branch state are understood.
- Any required domain, trademark or external account transfer is documented separately.

FolioFrame IP License Transfer Checklist

Purpose

This checklist supports diligence for intellectual property, licensing and transfer readiness.

It is not legal advice and should be reviewed by qualified counsel before closing.

Brand Name

- Confirm FolioFrame name ownership.
- Confirm trademark availability in relevant jurisdictions.
- Confirm whether any trademark filings exist or are needed.
- Confirm domain ownership and transfer process.

Approved Brand Assets

Confirm transfer rights for:

- Approved primary logo files.
- Approved standalone emblem.
- Approved flagship visuals 01-10.
- Curated motif files.
- Website and portal design implementation.

Repository Work Product

Confirm ownership or assignment for:

- Source code.
- Documentation.
- Module content.
- Pricing and offer copy.
- QA reports.
- Sale-room documents.
- Closing-package documents.

Third-Party Dependencies

Review licenses for:

- Next.js

- React
- TypeScript
- Tailwind CSS
- Prisma
- Clerk
- pg
- ESLint
- ReportLab if PDF generation scripts are retained

Asset Restrictions

Do not use:

- Rejected generated motifs.
- Image-generated logo variants.
- Redrawn or traced FolioFrame logos.
- Generated closing-package page images as final sale materials.
- Any asset without confirmed usage rights.

Data And Privacy

Confirm the repository does not include:

- Real customer data.
- Production payment data.
- Live support tickets.
- Production credentials.
- Private API keys.

Buyer Counsel Review

Before closing, buyer should review:

- IP assignment language.
- Domain transfer agreement.
- Trademark status.
- Third-party dependency obligations.
- Asset license evidence.
- Privacy policy and terms before public commercial use.

Closing Status

Recommended status:

- Transferable as a source-code, documentation, brand-system and static demo asset.
- Not cleared as a live SaaS operating business without separate production, legal and security review.

FolioFrame Technical Handover

Technical Summary

FolioFrame is built as a Next.js App Router project with TypeScript and Tailwind CSS.

The current deployment branch is:

- folioframe/deploy-production-static-demo

The current source baseline commit is:

- 8e6f830 Add FolioFrame production static demo deployment checklist

Package Manager

Use npm.

Package manager declared in package.json:

npm@11.12.1

Key Commands

npm ci

npm run prisma:generate

npm run lint

npm run typecheck

npm run build

Development command:

npm run dev

Build Status

Latest verified production build on 2026-07-04:

- npm run prisma:generate: passed
- npm run lint: passed
- npm run typecheck: passed
- npm run build: passed
- Static pages generated: 63/63

Route Families

Public website:

- /
- /signature-launch
- /signature-launch-system
- /pricing
- /modules
- module detail routes
- legal/support starter routes

Static portal/demo:

- /app
- /app/premium-dashboard
- /app/implementation-docs
- module workspace routes
- live foundation and workspace setup foundation routes

Auth foundation:

- /sign-in
- /sign-up

Environment Variables

For production static demo deployment, only the public app URL is required:

`NEXT_PUBLIC_APP_URL="https://your-production-domain.example"`

Do not add live production secrets during the static demo phase.

Static/Demo Runtime Boundary

The current site should remain honest that:

- There is no live billing.
- There is no production auth operation.
- There is no real customer data.
- There is no live fulfilment automation.
- There is no live monitoring.
- There are no real support tickets.

Live Product Foundation

The repository includes planning and foundation work for future live operation:

- Prisma schema foundation.
- Local Postgres development setup.
- Clerk auth foundation.
- Workspace/service helpers.
- Static fallback behavior.

These are not the same as production SaaS readiness.

Deployment Notes

Relevant deployment documents:

- docs/deployment/FOLIOFRAME_STATIC_BUYER_DEMO_DEPLOYMENT_NOTES.md
- docs/deployment/FOLIOFRAME_PRODUCTION_STATIC_DEMO_DEPLOYMENT_CHECKLIST.md

Handover Recommendation

Deploy as a static service website and static demo surface first.

Scope live SaaS functionality separately, with secure credentials, production auth, database isolation, payment webhooks, email sending, monitoring and legal/privacy review.

FolioFrame Commercial Materials Index

Purpose

This index points a buyer to the commercial and diligence materials already prepared for FolioFrame.

Sale-Room Pack

Primary folder:

- docs/sale-room/

Key documents:

- docs/sale-room/FOLIOFRAME_BUYER_ONE_PAGER.md
- docs/sale-room/FOLIOFRAME_ACQUISITION_MEMO.md
- docs/sale-room/FOLIOFRAME_DEMO_WALKTHROUGH_SCRIPT.md
- docs/sale-room/FOLIOFRAME_PRODUCT_SUMMARY.md
- docs/sale-room/FOLIOFRAME_ASSET_IP_MANIFEST.md
- docs/sale-room/FOLIOFRAME_QA_EVIDENCE_SUMMARY.md
- docs/sale-room/FOLIOFRAME_DEPLOYMENT_READINESS_SUMMARY.md
- docs/sale-room/FOLIOFRAME_STATIC_DEMO_BOUNDARY_DISCLOSURE.md
- docs/sale-room/FOLIOFRAME_BUYER_FAQ.md
- docs/sale-room/FOLIOFRAME_VALUATION_RATIONALE.md
- docs/sale-room/FOLIOFRAME_OUTREACH_EMAIL.md
- docs/sale-room/FOLIOFRAME_BUYER_REVIEW_ORDER.md
- docs/sale-room/FOLIOFRAME_RED_FLAG_DISCLOSURE_SUMMARY.md

Exported sale-room files:

- docs/sale-room/FolioFrame_Buyer_Sale_Room_Pack_v1.pdf
- FolioFrame_Buyer_Sale_Room_Pack_v1.zip

Closing Package

Primary folder:

- docs/closing-package/

Exported closing-package files:

- docs/closing-package/FolioFrame_Closing_Package_v1.pdf
- FolioFrame_Closing_Package_Source_Controlled_v1.zip

Service Offer Structure

The commercial offer structure includes:

- FolioFix Audit
- FolioFrame Pro System
- Signature Launch System
- Signature Launch Premium
- Signature Launch + LaunchRoom
- MigrationFrame add-on
- AgencyFrame
- AccessGuard + ProofMetrics retainer

Buyer-Facing Demo Routes

Priority review routes:

- /
- /signature-launch
- /pricing
- /app
- /app/implementation-docs

Commercial Boundary

FolioFrame can be positioned as a premium service brand and static demo foundation.

Do not represent it as active live SaaS or automated fulfilment software until production systems are implemented.

FolioFrame Deployment Transition Plan

Purpose

This plan describes how a buyer can transition FolioFrame from the current repository state to a production static demo deployment.

Current Deployment Position

Recommended deployment state:

- Static service website.
- Static portal/demo surface.
- Approved FolioFrame brand assets.
- Static/demo boundary messaging preserved.

Current branch:

- `folioframe/deploy-production-static-demo`

Current source baseline commit:

- `8e6f830` Add FolioFrame production static demo deployment checklist

Deployment Commands

Use:

```
npm ci
```

```
npm run prisma:generate
```

```
npm run lint
```

```
npm run typecheck
```

```
npm run build
```

Expected build result:

- Production build passes.
- 63/63 static pages generated.

Environment

Required for static deployment:

```
NEXT_PUBLIC_APP_URL="https://your-production-domain.example"
```

Do not configure production secrets for this phase.

Forbidden Static-Phase Secrets

Do not add:

- Production DATABASE_URL
- Production Clerk secrets
- Stripe secrets
- Resend secrets
- Zapier or Make webhook URLs
- MailerLite or ConvertKit API keys
- Airtable API keys
- Vimeo access tokens
- Real customer or support credentials

Transition Steps

1. Confirm branch and commit.
2. Set NEXT_PUBLIC_APP_URL.
3. Run the verification commands.
4. Deploy to the chosen static-capable host.
5. Verify /, /signature-launch, /pricing and /app.
6. Confirm static/demo language remains visible.
7. Confirm no live integration settings are exposed.
8. Capture post-deploy screenshots.

Rollback

If post-deploy QA fails:

1. Roll back to the previous known-good deployment.
2. Keep deployment logs.
3. Fix in a branch.
4. Rerun all verification commands.
5. Redeploy after QA passes.

Future Live Phase

Live SaaS work should be separate and approved.

It should cover:

- Production auth.
- Database isolation.
- Payment webhooks.
- Email sending.
- Support request handling.
- Monitoring.
- Legal/privacy review.
- Security review.

FolioFrame Red Flag Disclosure

Required Buyer Disclosure

FolioFrame is currently a buyer-ready static service website and static portal/demo surface.

It is not currently an operating live SaaS, live billing platform, payment processor, customer database, support desk, monitoring system or automated fulfilment engine.

Not Live

The following are not live production capabilities:

- Live billing
- Live Stripe checkout
- Live webhooks
- Production auth
- Real customer data
- Live support tickets
- Live email sending
- Live monitoring
- Automated fulfilment

Demo Data

Portal content is static or fictional demo data.

Do not represent portal rows, dashboards, metrics or owner-action queues as real customer records.

Legal And Privacy

Before commercial launch, buyer should complete:

- Legal review.
- Privacy review.
- Terms review.
- Refund-policy review.
- Data processing review.
- Customer support and deletion process review.

IP And Brand

Before closing, buyer should confirm:

- Logo and visual asset rights.
- FolioFrame trademark availability.
- Domain ownership.
- Third-party license obligations.
- Any contributor assignment requirements.

Safe Statement

FolioFrame is ready to review, present and deploy as a static service website and static portal/demo.

It is not ready to operate as live software until production systems and diligence are completed.

FolioFrame Closing Checklist

Repository

- Confirm current branch is folioframe/deploy-production-static-demo.
- Confirm source baseline commit is 8e6f830.
- Confirm worktree is clean at handover.
- Confirm buyer has repository access.
- Confirm buyer has ZIP or archive access if needed.

Build

- Run `npm ci`.
- Run `npm run prisma:generate`.
- Run `npm run lint`.
- Run `npm run typecheck`.
- Run `npm run build`.
- Confirm 63/63 static pages generated.

Assets

- Confirm approved logo files exist.
- Confirm approved visual files 01-10 exist.
- Confirm curated motif folders exist.
- Confirm no rejected generated asset filenames appear.
- Confirm no generated closing-package page image is used as final material.

Documentation

- Review sale-room pack.
- Review closing package.
- Review deployment checklist.
- Review static/demo disclosure.
- Review implementation docs and SOPs.
- Review live-product roadmap and security boundaries.

Deployment

- Set `NEXT_PUBLIC_APP_URL`.
- Do not set forbidden live secrets for static demo deployment.

- Deploy static service website.
- Verify priority routes.
- Capture post-deploy screenshots.

Legal And IP

- Confirm FolioFrame name diligence.
- Confirm domain transfer.
- Confirm approved asset transfer rights.
- Confirm third-party dependency license review.
- Complete legal/privacy review before public commercial operation.

Final Boundary

- Confirm buyer understands this is a static service website and static portal/demo.
- Confirm buyer does not market it as live SaaS until production systems are complete.

FolioFrame Closing Sign-Off

Package

- Package: FolioFrame Closing Package v1
- Generated date: 2026-07-05
- Source branch: folioframe/deploy-production-static-demo
- Source baseline commit: 8e6f830 Add FolioFrame production static demo deployment checklist

Seller Confirmation

Seller confirms, subject to final legal agreement:

- The provided package represents the current FolioFrame repository and documentation state.
- The approved FolioFrame logo, visuals and curated motifs are the only brand assets intended for use.
- Generated closing-package page images are not final sale materials.
- The static/demo boundary has been disclosed.
- No production credentials are intentionally included.

Seller name:

Signature:

Date:

Buyer Confirmation

Buyer confirms:

- FolioFrame is being reviewed as a static service website and static portal/demo surface.
- FolioFrame is not currently represented as live SaaS or automated fulfilment software.
- Production auth, billing, integrations, legal/privacy review and security review remain separate future work.
- IP, domain, trademark and asset rights diligence remain buyer responsibilities before closing.

Buyer name:

Signature:

Date:

Advisor Or Witness

Name:

Role:

Signature:

Date:

Final Recommendation

Proceed only if the buyer accepts the static/demo boundary and any legal, IP, domain and production-readiness conditions are resolved in the transaction documents.

FolioFrame Closing Package Manifest

Package Summary

- Package: FolioFrame Closing Package v1
- Generated date: 2026-07-05
- Source branch: folioframe/deploy-production-static-demo
- Source baseline commit: 8e6f830 Add FolioFrame production static demo deployment checklist
- Package manager: npm@11.12.1
- Build verification date: 2026-07-04
- Build verification result: npm run prisma:generate, npm run lint, npm run typecheck and npm run build passed
- Static build reference: 63/63 pages generated in the latest verified build

Included Source Documents

- docs/closing-package/FOLIOFRAME_CLOSING_PACKAGE_SOURCE.md
- docs/closing-package/FOLIOFRAME_TRANSACTION_SUMMARY.md
- docs/closing-package/FOLIOFRAME_ASSET_TRANSFER_SCHEDULE.md
- docs/closing-package/FOLIOFRAME_IP_LICENSE_TRANSFER_CHECKLIST.md
- docs/closing-package/FOLIOFRAME_TECHNICAL_HANDBOOK.md
- docs/closing-package/FOLIOFRAME_COMMERCIAL_MATERIALS_INDEX.md
- docs/closing-package/FOLIOFRAME_DEPLOYMENT_TRANSITION_PLAN.md
- docs/closing-package/FOLIOFRAME_RED_FLAG_DISCLOSURE.md
- docs/closing-package/FOLIOFRAME_CLOSING_CHECKLIST.md
- docs/closing-package/FOLIOFRAME_CLOSING_SIGN_OFF.md
- docs/closing-package/FOLIOFRAME_CLOSING_PACKAGE_MANIFEST.md
- docs/closing-package/render_closing_package_pdf.py

Exported Files

- docs/closing-package/FolioFrame_Closing_Package_v1.pdf
- FolioFrame_Closing_Package_Source_Controlled_v1.zip

PDF render status:

- PDF page count: 28
- PDF render date: 2026-07-05
- PDF source: Markdown files plus docs/closing-package/render_closing_package_pdf.py

Approved Asset References

The PDF renderer uses:

- `public/assets/logos/APPROVED_primary_logo_transparent.png`
- `public/assets/visuals_01_to_10/visual_10_Sale_Room_Cover.png`

The source documents reference approved visual and screenshot evidence paths.

Excluded Items

The package excludes:

- `.env`
- `.env.local`
- Production credentials
- Local database volumes
- `.next/`
- `node_modules/`
- `.git/`
- Rejected generated assets
- Generated closing-package page images

QA Summary

- Approved logo asset use: required and verified by renderer source.
- Generated logo or generated page image use: forbidden.
- Rejected asset filename references: must be zero.
- Image paths: must exist.
- Static/demo boundary language: required in source and PDF.
- PDF render: required.
- ZIP integrity: required.

Final Recommendation

This package is suitable for closing review as a deterministic source-rendered document set.

It should not be used to imply FolioFrame is a live SaaS, live billing product, production auth system, customer database, live monitoring system or automated fulfilment platform.
